Two different swinging motions and a variety of other customizable features allow you to choose and combine what baby likes best. SmartSwing Technology offers six different baby swing speeds from low to high—whether baby is rocking side-to-side, or swinging head-to-toe. It's easy to switch from one swing motion to another; just turn the seat! This cradle swing actually senses baby's weight, so speeds won't slow as baby grows, and it starts without a push. (What a smart idea!) Soothing features have been tucked into nearly every angle of this cradle swing. Sweet animals (elephant, giraffe and lion) fly overhead to encourage eye tracking. 16 songs and nature sounds help soothe, too. The mirror in the center lets babies see their reflection and around the room. Two convenient power options make this two-in-one baby swing easy to use anywhere. Plug it in for battery-free baby swing operation when you're near an outlet, or switch to battery power swinging when you're not!
